

# ANOUAR DERJA

Junior Full-Stack Developer (Backend Focus)

El Jadida, Morocco | LinkedIn: [linkedin.com/in/anouar-derja](https://www.linkedin.com/in/anouar-derja) | GitHub: [github.com/Anouar-Derja](https://github.com/Anouar-Derja) | Portfolio: [anouar-derja.github.io](https://anouar-derja.github.io)

## PROFESSIONAL SUMMARY

Junior Full-Stack Developer with a strong backend focus and solid foundations in C#, .NET, and SQL Server. Experienced in building real-world desktop systems using clean architecture, SOLID principles, and 3-Tier Architecture. Comfortable working with RESTful APIs, databases, and frontend fundamentals. Seeking a junior backend or full-stack role.

## TECHNICAL SKILLS

Languages: C#, C++, JavaScript

Backend: .NET, ASP.NET, REST APIs, SQL Server, T-SQL

Frontend: HTML, CSS, JavaScript

Architecture & Concepts: OOP, SOLID, 3-Tier Architecture, MVC

Tools: Git, GitHub, Visual Studio, VS Code

## PROJECTS

### Bank Management System – C#, SQL Server

- Designed and implemented a desktop banking system using 3-Tier Architecture
- Developed authentication, transactions, and account management features
- Used SQL Server and T-SQL for data integrity and transactional consistency
- Applied SOLID principles for maintainability and scalability

### DVLD Management System – C#, SQL Server

- Built an administrative system to manage driving license workflows
- Implemented clear separation of business logic and data access
- Focused on validation, clean architecture, and data consistency

### Clothes Store Frontend – HTML, CSS, JavaScript

- Developed a responsive frontend store with product listing and cart functionality
- Implemented client-side search and category filtering
- Strengthened understanding of frontend and backend interaction

## EDUCATION

Self-Taught / Professional Training – Software Development (Backend & Full-Stack)  
Focused on backend development, databases, and real-world system design

## LANGUAGES

Arabic: Fluent | English: Professional Working Proficiency (B2)
