PROFESSIONAL SUMMARY

Backend Developer specialized in C#, .NET Core, and REST APIs, focused on engineering scalable enterprise systems. Solved 300+ algorithmic challenges. Proficient in Clean Architecture, 3-Tier Architecture, SOLID design principles, secure JWT authentication, and SQL Server optimization.

SKILLS

Backend: C# , .NET Core, ASP.NET Core Web API , EF Core & LINQ , JWT & Refresh Tokens , REST APIs , C++.

Databases & Arch: SQL Server, T-SQL, Clean Architecture, 3-Tier Architecture, SOLID Principles, OOP, Data Structures

Frontend & Tools: React, Vite, JavaScript, HTML5/CSS3, Git, GitHub, Postman, Swagger.

PROJECTS

CARVIA - Full-Stack Car Rental Management System,
Technologies: ASP.NET Core API, React, EF Core, SQL Server
• Engineered a rental platform using Clean Architecture, implementing a multi-stage booking workflow with RBAC, JWT, and Refresh Tokens.
• Developed a responsive UI with React + Vite, seamlessly integrating state management with ASP.NET Core REST APIs

DVLD Management System, *Technologies: C#, SQL Server, SOLID Principles*
• Engineered a core data validation application using 3-Tier Architecture and SOLID principles to isolate business logic and reduce coupling.

Bank Management System, *Technologies: C#, SQL Server, T-SQL, OOP*
• Architected a secure, 3-tier banking platform incorporating role-based access control and transactional T-SQL workflows for concurrent transfers.

WORK EXPERIENCE

Freelance Product Designer, *Merch by Amazon* 2023 – 2024
- Performed data analysis and requirement gathering to optimize search visibility and product conversion.

EDUCATION

Self-Taught Software Engineering Curriculum, *ProgrammingAdvices.com* 01/2024 – Present
- Solved 300+ algorithmic challenges,certified in C#, SQL, SOLID, and REST APIs

High School Diploma, *Al Khawarizmi* 06/2022
