TECHNICAL SUMMARY

Backend developer specialized in C# and .NET, focused on building scalable, maintainable systems. **Demonstrated strong logical expertise by solving 300+ algorithmic problems.** Experienced in Clean Architecture, REST APIs, and database optimization using SQL Server.

SKILLS

Backend: C#, .NET Core, .NET, C++, REST APIs, Windows Services.

Database: SQL Server, T-SQL, Relational Database Design.

Architecture: Clean Architecture, SOLID, OOP, 3-Tier, Data Structures.

Frontend: HTML5, CSS3, JavaScript.

Tools: Git, GitHub.

PROJECTS

DVLD Management System, *Technologies: C#, SQL Server, SOLID Principles*
• **Engineered** a core data validation app using **Clean Architecture** and **SOLID principles** to isolate business logic, maximizing maintainability while reducing architectural coupling.

Bank Management System, *Technologies: C#, SQL Server, T-SQL, OOP*
• **Architected** a secure, 3-tier banking system with role-based access control, **ensuring continuous data integrity** and fault tolerance during concurrent transfer processes.

Clothes Store (Frontend Project), *Technologies: HTML, CSS, JavaScript, IndexedDB*
• Developed a responsive user interface with real-time filtering, using IndexedDB to **minimize client-side data load times** and maximize offline responsiveness.

EXPERIENCE

Freelance Product Designer, *Merch by Amazon* 2023 – 2024
- Focused on market-driven concepts for digital products to maximize listing visibility and conversion metrics.

EDUCATION

Self-Taught Software Developer, *ProgrammingAdvices.com* 01/2024 – Present
- Solved **300+ complex algorithmic challenges** to master advanced backend architecture and SOLID principles.
- Earned comprehensive curriculum certifications covering C#, C++, OOP, Data Structures, SQL, T-SQL, SOLID, REST APIs, and core web tech.

High School Diploma, *Al khawarizmi* 06/2022

LANGUAGES

Arabic: Native • **English:** Professional Working Proficiency
